On January 5, 2007, Basin Electric Power Cooperative, Inc. (Basin Electric) filed an application with the Public Utilities Commission (Commission) seeking an energy conversion facility permit to construct a second peaking resource generator at the existing Groton Generation Station near Groton, South Dakota. The project is proposed to serve projected member load growth and is known as the Groton Generation Station Unit 2 Project. The proposed project will include a second 80 to 100 megawatt simple cycle natural gas combustion turbine generator.

On January 11, 2007, the Commission electronically transmitted notice of the filing and the intervention deadline of March 6, 2007, to interested individuals and entities.

SDCL 49-41B-12 authorizes the Commission to assess a maximum fee not to exceed one-quarter of one percent of the first one hundred million dollars of estimated construction costs of the facility. However, the minimum total fee chargeable may not be less than eight thousand dollars. The fee shall be deposited in the South Dakota Public Utilities Commission's (SDPUC) regulatory assessment fee fund to defray Commission expenses incident to analyzing and ruling upon this type of filing.
